NEW STORIES IN SHORT**The Troubled Lady**

Some beggars raped a mad lady by the side of a lonely road area. Her old friend with her husband accidentally saw that incident when going by car. She cried and worried a lot and carried her to their house.

She wanted to keep her with them in house and give treatment. Her husband refused and told to admit in a good mental hospital with the help of their own expense. Wife agreed and admitted her in a hospital. She slowly recovered.

But again she was raped by two hospital workers due to the attraction of the high beauty of the lady. While the second man was attempting the rape, she realized the things going which was on and suddenly she overpowered and attacked him by the available hard things near and killed him.

The recovered and realized lady told her friend the whole matter. In turn she guided her to behave as complete mad up to sometime hiding her recovery. The reluctant lady first denied and accepted then.

Police came and judicial action had taken place. Doctors certified her as mad. She was freed without any punishment. Another hospital worker jailed.

Her friend took care of her, brought to her house and got her a job after few days.

Inside story

The affected lady hailed from an upper middle class and . helped her friend a lot during school days. She got married. After sometime her parents family became poor due to some untoward incidents and accidents happened to the industrial properties belonged them.

The money minded husband started troubling her and left her for a long time. Then a gentleman took care of her and did many good things and kept her good.

On knowing that matter the long left husband got irritated and angry. He kidnapped the man with goondass support and called her wife to the spot.

In front of her they had severely beaten the man up to death. The witnessed lady of the cruel thing became sudden mad and wandered as a beggar then.

Seeing this happenings on newspaper the angered father - in- law of the lady killed his son with lethal weapons and was jailed.

Everyone is different

A deputy tashildar frequently visited a village for some Govt development programme. Though he lived in his fifties he was smart and active. A married young woman of that village liked and loved him since her husband was having many concupines and did not give her good attention and care. Her husband used to come to her house once in a month or two only .

The lady opened up her interest with the deputy tashildar. He was reluctant at the beginning but by the youth and beauty of the lady he was induced and joined her. The husband of the lady came to her and quarreled . The lady did not respect him and scolded him as an useless and told her mind of not to live with him anymore. The vexed husband left her once for all and never returned.

She had continued the relationship with the deputy tashildar. After a period of six months he had taken her out of the village and lived in a nearby town. She was fond and made him very happy. He got thrilled by the sex and service of the lady as he had not enjoyed even 1/3 of her goodness from his unbeautiful, stout, rough wife. Slowly he stopped the showing of interest to his own family. His wife with children left him to her parent's house after many fights between them.

Matter came to light. Though his wife did not complain to police or his dept, he was suspended and subsequently removed from service through departmental actions as he was not in good books with some of his officers.

He struggled for living in addition to his second lady. In this crucial time a local businessman who got many helps from him when he was in service helped and provided a house and also a clerk job. They lived happy for a short period only.

Because in the meantime the immoral character of the wife of the businessman played witchy role in their life. She had lived an extra enjoying life with the family car driver who is an unmarried. The driver had the intension of having sex with more ladies. And so he had an eye with the wife of the new clerk (ex- deputy tashildar). The driver told his intention to the wife of the businessman and asked her to help in this process.

She initially refused and later accepted due to his continued pressure and the illegal connection with him. She introduced the driver to the clerk's wife and praised him a lot to improve the impact. The driver spent more time in the next few days to get her attention. One day he went to her and expressed his desire of entertaining her. On refusal he forced her and she ran hither and there to prevent his attempt. At that time she found a iron pipe, took and beaten him without any aim on his body. But accidentally his head got highly injured and he fainted. He was admitted to hospital and declared mentally invalid as his brain was severely damaged.

The angered wife of the businessman falsely informed the police that the clerk's wife had attacked him due to his non- acceptance to her immoral sexual interest. But her husband the present clerk did not accept her statement as he was having good understanding and faith with his second lady.

Police arrested her and she was given two years jail term by the court. After six months the clerk's first wife expired in her parents house due to severe sick. He attended her death and met family and relatives fight. Later he joined with his only son who was an engineer. His second lady was released from jail after 2 years of imprisonment. He received her at the gate of the jail and brought to his son's house and lived. Two months later they celebrated his son's love marriage. Both couples lived in the same house as a joint family.

Genuine Juvenile

One young couple received a 10 years old young girl from juvenile jail after three years punishment period. Who was that girl? What for she punished.

While this young couple were leading a very happy life. there was a family in the neighbourhood. A middle aged man who was in the character of disliking the other people on more happy was living He with his wife and 7 years old daughter in the house. The sadist man was envy with the neighboring young couple and started troubling them.

Wrong- letters, phone calls, witchy works, lies, praising anyone more at a time, comparing them with others, giving more drinks to the young man were the works done by the middle aged man. to create dispute between the couple. So sometime little quarrels opened up between the couple .

He felt little happy at those times. In the meantime his wife died in a fire accident in her working place. After that he felt more loneliness and could not digest any more happiness of the neighbourhood young couple. The daughter of the man silently witnessed many of his witchy works against the couple. Nevertheless, she was fond of her father as he liked her more.

One day at the very early morning the girl noticed while her father was placing a bomb in the couple's car to explode on starting .

She took the pistol of her father and kept behind her back by right hand. Went to the father and pretended to be playing with him.

She requested him to open his mouth so that to keep sweets in his mouth. Father opened his mouth. All of a sudden the girl kept the pistol mouth inside his mouth and clicked the trigger. The man died on the spot.

On hearing the pistol sound the neighborhood couple rushed out of their house. At the same time girl ran towards the couple's car to take away the bomb. The couple ran faster than the girl towards the car.

All of a sudden the girl fired but on the car prior to the arrival of the couple near the car. The car exploded with huge louder noise. The couple frightened and everybody surround the place had confused. Then the girl had thrown away the pistol and ran towards the couple.

In a utter confused mind the couple allowed the girl to come close to them. The girl told everything. The police arrived and arrested the girl. The couple arranged a lawyer and tried a lot to rescue her from any punishment. Eventhough the jury conceded the argument he awarded a minimum of 3 years juvenile home punishment.

The greatest husband

Frequently quarrelling couple divided. The husband applied for divorce. The wife had not interested to leave him permanent and pleaded him to reunite. He did not fully respond her. In the meantime he started loving another woman. But the new woman was more hard to the first woman. So he confused.

The first woman always helped him a lot indirectly even after their separation. He could not feel to stop her doing good to him since he partiality liked her. One day his wife on separation called her husband and his new lover together to a place. She requested the both that we all the three live together and her readiness to accept his new lover as an another wife of her husband.

The irritated second woman scolded the both and had beaten her. He blocked the second woman while beat the first. His wife cried. The man seemed uncomfortable of the incident the confused man and her lover left the spot. He was not fully happy with the second woman. After a week time he heard the news of his wife's death by suicide.

He rushed to her house. She was already taken to cremation yard and cremated as per Hindu sastra. Everybody left the place. The most sad minded emotional husband all of a sudden had taken the petrol can from his car and poured petrol over his body. And jumped over his wife's burning body holded the body very tight. Due to the extreme burning heat he made heavy shouting with cries.

All the people around the area rushed to the cremation yard. By the time both were burnt, News spread. The second woman also came there cried on extreme sorrow and praised his lover as the ever greatest husband of a woman on earth. She also felt very sad for having beaten his wife which might had caused her suicide. On the spot she decided not have henceforth family life and to join in nun training to serve the people particularly to concentrate on solving the disputes between couples.

Hasty nasty

There were two athletic good friends A& B. They were always 1st and 2nd regularly without change in the sports competition. But the 2nd place running athlete 'B' always had in mind to beat his friend on one day. He tried a lot but couldn't succeed.

Gradually difference of opinion raised between them and it weakened their friendship . One day 'B' secretly inserted a small iron nail in the shoe of his friend before he worn for the competition since they had stayed in one room. Athlete 'A' failed in the half of the field and 'B' got the first place in the next meet. Due to the nail injury in the leg athlete 'A' could not able to get the first place at the following few meets. His girl friend annoyed and started disliking him. She also became one among the girl friends of 'B' in due course.

In a happy intoxicated mood 'B' revealed everything of the nail fixed matter to her first girl friend. She got angry at the first instant itself and left him in search of the affected 'A'. She told everything to 'A' and asked him to attack and kill 'B'. But 'A' told her that he might be forgiven for his mistake as he was the best friend once. Her attraction towards 'A' raised to an enormous unlimited level. They become true good friend and lovers later. The earlier girl friend of 'A' who left him became confused. At the loss of his beautiful girlfriend who was now with 'A', 'B' planned to attack and kill 'A'. One day fight started in the presence of all the four. In the tussle 'A's' lover shot and killed 'B' in the presence of 'A's' previous girl friend who joined with 'B' now.

Prior to the arrival of police the previous girlfriend of 'A' snatched the revolver from the hands of 'A's' lover and carefully cleaned the object and placed at the hands of 'A'. 'A' died and laid 'B'. Informed the police and on arrival they said 'B' committed suicide by shooting himself. Investigation were going on. 'A' and his lover married. 'B's' girlfriend had gone somewhere.

Hungerless people

Character - Animal scientist (Vs), his wife (fe) & children Vs a slightly handicapped man was working as an animal scientist in a big zoo. His wife fe a cruel rough and tough woman much more interested with unlimited sexual desire and not respectful to her husband. Their children two girls and a boy were in teens. They were almost bad charactered lavish spending, enjoying everything. They were fond of their mother only and supported her. And they were not caring and due respecting their father as he was little distractive.

So the scientist fond of zoo animals and cared for them. One day in the middle of his office time he came to his house. He saw his wife with another man in the house and kissing each other. He worried and wept. On enquiry his wife replied that she was in project /business discussion with him. He was not satisfied with her statement as he knew of her bad character of having sexual link with some other men. As he was a supportless weak and handicapped man he couldn't do much opposing his wife.

Days were gone . Due to some kind of natural calamity. famine attacked a part of the country. Shortage of food for men and animal appeared. The animals were in need of more food than earlier. Big problems raised. The leader of the country requested all the scientists to do the needful to tackle the problem .

Animals wandered everywhere with hungry and even starving people afraid of animals for fear of life as they would kill and eat them. Scientists gave some ideas. Left many animal in the middle of the forest so that the strong ones prey the weak categories and thus to solve the food problem to some extent for time being. The authorities wanted to send the zoo animals also to the forest.

But the Vs liked to keep the zoo animals in their caves themselves as he loved them. He asked to give more ventilation, reduction of heat temperature by soaking the surrounding with water, more water to drink to have more oxygen at frequent intervals, and little uncooked solid fatty food which would require more time for digestion. Visitors to the zoo were stopped to avoid the animals more movement.

Even then the problem could not be solved to the desired level. Animal and Zoo scientist including Vs had indulged in vigorous researches to control the hunger.. After a few days Vs had invented a wonderful mixture to reduce the appetite.

He explained the details of the product and warned to have more caution and care in the dosage. The mixture had to be given to animals according to their size and strength. Because the continued high dosage may stop the hunger completely and might lead to death in a week or two. Vs was praised by everybody and was given awards and rewards.

With the support of the mixture the animals food problem was reduced to great extent by providing the very limited food from the available storage.

He was pressurized to disclose the formula of the his product even for bigger money. He denied and said that it might spoil the natural balance when continued and wished the usage of his product to be stopped at the earliest after the problem could be controlled to the disired level. But he was humiliated by his family members as he had refused the good amount of money offered for the disclosure of the formula of his product. He was compared with animals and termed him as and impotent.

Since no other woman loved him he was unable to leave his family. After some days when a family problem started he was beaten and kicked up by his family members and his genetal part was damaged during the attacks.

He cried of his less worthyness of a normal human and left the house. His mind became very angry and thought of doing some problems to his family members and some other people who often mocked at him. He wanted to teach them a lesson and to make them hungerless and loss their livers.

He stored enough drinking water for his use at a secret place. He made his hunger reducing mixture in heavy quantity and mixed with drinking water through making a hole in the pipeline of his residential area. Everyone of his area consumed the adulterated water. After a few days everyone except him became hunger ess and started hating food and they gradually became worthless, weak and losing the interest of everything such as sex, entertainment, dress etc .,

Within a month almost all of them left houses, started wander in naked and became slender and very week day by day and laid their body wherever go. Everybody, the govt, ministers, beaucrazy , neighbouring countries and the world worried about that incident. Suspicion came over the scientist and everybody searched for him. But he already left the country with the change of identity and felt happier of the troubles of his family and hitherto surrounding as a revenge.

At last his mind turned soft and decided to change the worst situation since some many had started dying

He made an alternative to counter the effect of the product on living beings in the next few days in high speed research . He came in different make up to his area where people suffering.

He climbed the ladder of the water tank in the night dark. The he poured and mixed enough the anti - mixture in the water and slowly getting down. Due to the water mixing sound suddenly the security on duty seeing a man climbing down the ladder and shot at him. He had fallen from the middle of the ladder with gunshot. He was identified and hospitalized immediately. Police and other scientists enquired about the incident. He said that he was the reason for the problem and also he had mixed the anti- mixture in the water and requested the affected people to drink the water at once. The doctor's tried for his life. At the dying minutes other scientist requested the formula of both the mixtures. He started to tell the formula of the first mixture. But unfortunately in the middle of his description he lost his life. Everyone puzzled and highly worried about the non- availability of full formula and the whole sad episode.

Insane cruel

A boy from a middle class family had grown up without the satisfaction and fulfillment of his many desires in his childhood young life. He was a short tempered and did not know to behave with others.

As everybody he also liked beautiful girls. But he could not able to pick up a girl to his eager since not knowing the technique.

He dejected and became sad. At last he got a very average lady as his life partner. But his desire for beautiful girls did not end.

One day all of a sudden he became very rich by a jackpot lottery. He wanted to use the money for both good and bad. He started social service centers for aged people and mentally retarded and spread for others also.

Other side he built secret cell chambers. And he kidnapped beautiful young girls, beaten them and locked in the secret cells without dresses and other belonging. They were given one time food per day. He totally picked 17 such girls. He heavily tortured them and cruelly raped. Few were killed and buried when they tried to escape and adamant. He also cut the chest and flesh of genital organ of the killed girls, cooked and ate as a cannibal like Idi Amin.

Other side he was fond of his wife and his small son and gave them everything. One day a wounded girl escaped in nude and informed everything to a road side walker to pass on to police.

On knowing this he escaped. Finally police caught him. The affected girls with the support of all the people wanted to kill him at once in nude after cutting his genital organ.

The govt and the authorities allowed the punishment in front of jurists. He was tied on a wooden post and his general organ cut and surrounded people pelted stones on him. He was slowly dying and was to be fired with the wooden post.

His wife, relatives and some of his friends tried to stop the punishment right from the initial stage but could not. They went to his social service homes and requested the elders and mentally retarded people to come along with them to rescue him.

All rushed to the spot. By the time he was severely injured. Clashes and chaos started. Police shot the tear gas shots to move the crowds. But there was no effective result. At last police started striking and fired at the crowd. Many seriously wounded and two people died including a lady.

The dying man apologized to the people especially to the women and died. His 3 years old young son went to his father, cried without exactly knowing the incidents.

His wife became calm. To the worst of the incident the body of the man was cruelly played by the mentally retarded meds and made into pieces. The society scolded the dead man and also his wife. His wife with her son left the spot with the worries of her future life with young son.

Loss of Lives

A 25 years old state hokey player was an ex- student of a lady professor. He was hero of the college. The professor was 37 years old but unmarried . She knew that he was loved by many girls during the collage days. She also liked him but not revealed out because of age difference.

She was a sports lover and also a sport woman in her student life. She met him two three times in different occasions including a sports meet. They had started talking and shared many discussions. Both liked each other due to the coincidence of mindset. He was fear of telling his love to her as she was an elder and respectful professor. But one day while both were talking over phone she herself initiated the matter of love and shown her interest on him. He understood and shared her love in severing voice. They became deep lovers and started roaming in outer.

In the meantime two of the many girls who liked him got angry over his love with the professor . Since the two girls were thick friends they jointly decided to trouble the professor to leave him.

But it had not yielded the result they expected. Worried and vexed girls colluded with some rowdies to kill the professor and any one of the two to love and marry him. For this arrangement they paid them good amount of money and their body also. The rowdies and the girls kidnapped the professor and warned her to leave him. On refusal she was beaten up and non fed for 5 days.

She lost her breath and the body was thrown in thorny bushes in a remote place then . The sportsman and her family members both separately searched the professor and not found . Her father complained to the police. After a week time police found out the body of the professor in highly decayed condition.

The sportsman cried and became mentally sad. The police identified the killers and arrested the rowdies but not the girls since they escaped. The search was going on. The angry sportsman decided to catch the girls, and kill them. Within a month period he killed both the girls one after another after raping and cruelly beaten them. Then he surrendered. and revealed everything to the police. The court awarded death sentence to the sportsman.

The Changing of life

A family had two sons. Elder son aged about 40 years had no interest in his marriage as he always concentrated in business development. As he was a clean habit and good character man a lady loved him but one side. Her proposal of love was unaccepted by him and he told her that would follow ascetism.

After sometime marriage activities of 35 years old younger brother started in the family. Parents searched a girl. Finally they went to a house to see a girl. The girl was the same who loved the elder brother. The girl and the elder brother disclosed this matter on the spot to both the families on the occasion.

By the truth and beauty of the girl and standard of the family the younger brother and his parents conveyed their consent of interest of marriage with the girl.

The parents of the girl showed some fear of the matter which may become a problem later. But the younger brother himself spoke. "It is not a problem; I know about my elder brother and he is my best well wisher as he is the most important in our family and working hard to raise our family wealth & status."

Marriage took place. The girl conceived and delivered a girl baby. Gradually the elder brother had shown more interest on the baby and started playing with her. In this context some closer movements accured between him and his brother's wife certainly in decent and gentle minds of both.

Unfortunately the younger brother's did not happy with the atmosphere and started doubting . Day by day he became very unhappy which lead to drinks frequently . He started coming home late night and in improper condition. When his wife, parents and brother asked and tried to correct, he fought with all . Problems started in the family.

One day when he was sharing drinks with his friends he opened up this matter to them. The friends in drunken mood mocked at him . He felt very shame, guilty and having been cheated.

Gradually he became angry with her wife, disliked and beaten her many times. At one time when his elder brother interfered while his brother was beating his wife quarrel and fight started between the brothers. The younger brother shouted heavy and scolded his elder brother. Heart broken elder brother left the house and stayed away from them.

In the meantime the younger brother started his connection with another one girl. On learning this and also of continued torture by her husband the wife of younger brother complained to police. Police warned and threatened him of serious actions if repeated. It escalated the difference between the couples.

He applied for divorce stating that his wife was having immoral sexual relationship with his elder brother. He arranged fraud witness by a friend. After two years of court proceedings divorce was given. The lady came out of the court with her daughter on hand and tears in eyes. In an unexpected turn the elder brother came from a side went to her, gently picked the child and holded her hand and proceeded towards his house.

The fate of a Scientist

A lady scientist was kidnapped by two terrorists to get the secrets of an important research. After a couple of days she was made to escape by two girls who were accompanying the terrorists in a secret place. She escaped but the matter of escape was not made out by the terrorists. Later the two girls also left them.

On suspicion of the girls' involvement in the scientist's escape terrorists made searches to find the scientist and the girls. On the chase one girl jumped into a big river from a good height bridge out of fear. She was drowned and killed as she did not know swimming.

Another girl entered a nearby big house for hiding. That was the house of an old aged smuggler. She told him the whole episode and surrendered to him. On knowing her identity he did not harm her. She also promised him to be a member of his gang if protected from the terrorists. On one occasion one of the two terrorists was shot dead by the smuggler. After hideout for two days unfortunately the lady scientist also entered the smuggler's house and requested asylum from the terrorist.

Another terrorist found out the hiding place of the girl and the scientist and entered the smuggler's house. He shot and killed the girl and in turn the smuggler killed the terrorist. After the incident the scientist had to stay with the smuggler. Out of fear the lady scientist acted as if loving the smuggler. The smuggler also threatened her to kill if she tried to escape from him.

So she stayed with him for a couple of weeks. One day she took his gun, shot and killed him and surrendered to the police. A police inspector and later a jail superintendent raped the scientist when she stayed in their custody for a short stint. She was freed by the court. Then she made out the news of her being raped by the inspector and jail Supdt. Enquiry conducted, proved of the officers crime. The officials removed from their jobs and each jailed for seven years rigorous punishment.

The novel genders

A French lady journalist arrived to interview Mr.'A'. He revealed her all his past things.

That he married a lady doctor by an arranged marriage. He was an IAS and became district collector after 15 years of service. He was strict and straight forward and had not listened and obeyed the illegal instructions and orders higher officers and politicians.

He earned bad name among the mighty power. He was against bribery and corruption as he was a brought up of a sainik school with discipline and also lived many years away from parents in a strict hostel life.

One day in a grand public function he was wantedly disrespected and mocked by a ruling MP and also he MP gave wrong instructions and critics. The annoyed collector got infuriated and angry by the high damage caused to his reputation. He became uncontrollable of his temper and in turn scolded the MP in little pitch. But his voice was recorded in a preplanned effort.

He was suspended from the service. He became irritated by the rendering of wrong verdict to a right person and so resigned his job even without informing his wife.

On arriving his house the govt doctor wife fought with him for having resigned his job. She also feared some repercussion to her working by the bad politicians. The quarrel between the couple escalated every now and then. Finally they came to a decision of mutual divorce between them.

Now the unemployed ex-district collector did not like to perform any govt job as he become aged and also having disqualified in the govt. In fact he wanted to be an unknown with a silent peaceful life. So he went to an adjacent state and joined as a gardener in a garden house since he was always fond of plants and gardens.

In the free time he started writing. He wrote new stories and became popular in due course. He was honored by international forums. He got so many fans around the world. On becoming great the garden house family highly respected him and felt sorry for kept him as a gardener unknowingly. They requested and begged him to stay with them as one among the family members.

He was at his 50. But a teenage girl who was the daughter of that family loved him very much and also conveyed him. He immediately refused her on informing his age. But on the repeated pressures of the girl for more days he became confused.

At that time the French journalist came for interview with him who was also an unmarried. She listened his previous life and fell in love with him. The already confused Mr. 'A' did accept her love at once and both shared their happiness open. On knowing the Matter the young teenage girl got angry and troubled the lady journalist a lot. After a few days Mr'A' and the journalist left that place to France and lived there.

After two years a marriage invitation came to the writer. It was for his son's (thro 1st wife) marriage. He alone started and arrived India to participate in his son's marriage. To the surprise on the marriage dias the bride was the earlier teenage girl of the garden house who terribly loved him Both shocked on seeing each other but had not revealed anything to others except the admittance of knowing each other as he had lived in her house.

After the marriage his son, his new wife and other family members and friends compelled him to stay in India with them. He reluctantly refused and flew to his present wife's nation with also the new couples for their honeymoon trip.

Lead the life

Two buses of four groups of adjacent states arrived a tour spot. Many had talked and mingled with others. Love started between the two from that two groups. After few hour rounding of the tour spot the sudden lovers boarded their buses and proceeded to the relevant destinations with deep feelings. They continued the talking from their place through mobile phones for long hours. Six month passed, communication not worked. The boy tried to contact the girl though the till date used mobile number but failed. He suspected that she had changed her mobile number.

The worried boy decided to go to her place due to the uncontrollable feelings about his lover. He went to her house with fears the of some repercussion. And at last brought the courage in mind and pressed the calling bell. Surprisingly the girl came out first but with her newly wedded husband. He was shocked. And in addition the girl and her husband mocked him as a fool, in their regional language mixed with english. Her parents and some neighbours had also joined there. Some from the crowd scolded the girl also and fortunately no one physically harmed him.

The dejected boy cried with tears and boarded a bus to return to his home. Unfortunately the bus met with an accident and many of the passengers were severely injured and locally hospitalized. He was one among the casualties. He stayed in the hospital for about two weeks. Interestingly a new love started between him and a nurse who helped him a lot in the hospital.

After his discharge from the hospital he married and brought her to his house. The parents of the boy shocked and heavily shouted and scolded the other language bride and asked his son to leave her immediately. They ordered their son that he could come to the house only single.

The no earning son confused and did not know what to do. He also loved his wife very much. The girl told her husband to come to her native place. Reluctant at first but agreed. Both gone to her home. The poor parents of the girl accepted and received them.

No enough money was available either with her parents or to the new couple. Everybody stayed half hungry for number of days. No suitable job was available.

She requested her family known small industrialist of that area to get a job for her husband. Readily he accepted to give jobs for both husband and wife but on the demand of her body for few days. She returned in angry and did some labor works for few days. The earning was very low and could not able to feed all.

So she felt no other way than to give her body to the industrialist. She sadly did it for two days and got the job to her husband alone and refused the offer of job to her.

He joined the job but not satisfied with the behavior of his owner towards him. The owner jokingly told everything to him that the way he got the job and compelled him to make accept her job in his company. He gone home and told the incidents in his workplace. She cried and fallen down on his legs and disclosed all the pre incidents of his getting job.

The emotional husband tightly holded her body and said "No Problem" I like you the most since you revealed all the truth that too to get me a job for my life. You had sacrificed your soul for the benefit of your husband. I promise that I will not show any difference any time with you. And you need not mind it and be as ever. Nothing could separate us. The girl worshipped him as of a god.

The couple decided to move to nearby town to seek jobs. In the next day morning they reached a town. She got a lower level nurse job in a private hospital on the same day. And he joined a middle level job in a week time. They had taken a rental house there and brought her parents and a younger brother all with them; and everyone lived happily.

REASONS AND SOLUTIONS FOR WORLD CRISIS

	Page No
1. Non - availability of sufficient fresh water	172
2. Religions – their inner divisions – their principles – enmity within the divisions of same religion and in-between the religions	180

NON - AVAILABILITY OF SUFFICIENT FRESH WATER

Fresh water is absolutely the most essential thing for the existence of living beings and as such human civilizations emerged on the banks of rivers in different parts of the globe at various times.

Rearing vegetation, growing food grains for human beings and animals and exclusive fodder items for animals are the things which have been being possible only by water from this immemorial. The necessity for fresh water increased with the alarming growth of human and animal populations. Man uses more and more water in his day-to-day life and he is also manufacturing different kinds of things to suit him growing necessary and unnecessary needs. Besides, there has arisen a peculiar need for controlling and stabilizing the temperature of the atmosphere on the earth. All these things speak volumes about the need of fresh water.

This leads to the necessity of storage of fresh water which will be making supply to a maximum possible time. Our ancestors had many devices of storage of fresh water. They had dug ponds and pools, tanks and lakes wherever possible and stored water.

These stores of water were making continuous supply all the year rounded contributed to their easy-going, happy life. Since the population was limited, the stored water was quite sufficient to cater to their needs throughout the year.

But unfortunately things went bad in the long run. Population grew and of number of industries rose along with the expansion of cultivable lands. On the contrary the water-stores were hard-hit. The size and depth of the pools, ponds, wells and lake got reduced considerably and the water supply was badly affected.

To add to the woe of the earth man has invented methods of sucking water from the depth of the earth. This kind of drawing ground water started from at the depth level of 5 feet and went in course of time to the level of 5000 feet and unavoidably to the level of 50000 ft. further man has been constantly sucking out crude and gas further depth of the earth. This has quite adversely affected the earth. Certain amount of natured wealth should be left untouched into the earth so that the balance of level of different layers and the temperature may kept intact.

Hence it should be remembered that the natural set-up of the inner earth shall on no account be disturbed. And any disturbance in these things in the past and will lead in future to nature disasters like tremors, earth quakes eruptions of volcanoes, out break of tsunamis etc.

The earth's gravitational power will be affected; the sea level will rise; there will be frequent storms, engulfing or leaving of lands etc. it will also lead to phenomena to the changes in liquidity, viscosity, gravitational effects, bonding strength, rotating speed maintenance of orbit, mass, weight etc, in sum, the normal functioning of the earth will be affected seriously and it will lead to frequent natural calamities in future more often than now.

It is a truth-and it is not known to many-that the natural wealth that are found at the deep depth of the earth is for its well-being and to proper, prolonged uninterrupted functioning, and not for human use as is being done now. Of course the earth possesses a number of energy sources on its surface for man's use but he hasn't learnt how to utilize them for his prosperity. This author is glad to disclose the fact that the method he has discovered to tap the tidal energy which is unlimitedly abounding on the earth's surface will come to light in the very near future. Owing to the growing demand for fresh water necessitated by the modern living style of man, more and more inner water of the earth is brought out/ this can be stopped not immediately but very shortly.

One ancestors adopted certain upper land storage processes by which the required amount of water could be got without much difficulty.

How could fresh water be stored in a large amount at a cheap cost? According to old scientific method any liquid / water could be kept in conclave vessels / places surrounded by walls or protected by shores and this method entailed much less cost.

The following methods shell be adopted for storing water on the surface of the earth.

1. The existing pools, ponds, lakes and wells shall be deepened, widened and their shores should be strengthened.

2. New ponds and lakes can be dug in areas of poor rain fall land rain water can be saved in them without any waste. The sand dug out during this procedure can be utilized to make bricks (using the water stored) and tiles which can be used to build composite houses, saplings can be planted on the sufficiently raised banks of old as well as new ponds and lakes and after these saplings get well rooted and grow to some height, monocotyledons can be planted on the outer surface. Care must be taken to prevent the flowers, fruits and the dry leaves from falling into the water. When such water resources are set up in these areas a number of labourers are likely to get jobs.

3. In villages when people build houses they can-if required land-space is available dig large pits and with the sand brought out they can manufacture bricks. The cost of the house goes much less and a small brick manufacturing industry also comes into existence. When rain water gets stored in these water points, fish may be grown in them and this leads to an increase in their income. Cattle can be reared and their excrete can be cultured into food for fish. Plants can also be reared in such areas. As a result of all these activities the temperature of the area falls considerably and the ground water level rises significantly

There is also another fantastic scheme for enormous water saving.

What for are the rivers existing? They help pass on the water that falls from hills and falls. A great portion of the rain water flows into the sea after being utilized for public use. In some places rivers are used to transport things from place to place. There are two types of rivers. There are perennial rivers in which water flows throughout the year. In many rivers water flows only for a short period and they remain dry for a long duration.

We can use such rivers to store water. The river bed can be divided into lakes by constructing wide walls across it, approximately at the rate one per km. initially the walls may be built up to half of the bank's height and it can be raised if need be, in the following years.

If sufficient rain water is not available to fill in such ponds and lakes constructed on the river bed water may be brought from the nearest falls by pipes. The water so collected may be supplied for public use by pipes. Since water naturally flows towards lower levels no energy is needed for supply of water from such sources, besides, fruit bearing trees can be planted along the river banks and cultivation can also be undertaken with the stored water.

Fish and cattle be reared in such areas. Houses may also be constructed adjacent to such cultivated lands. Roads and even rail-roads can be laid and in course of the people living in dry areas can be brought to these places. They can live well in these areas since water which is the source of happy living is available satisfactory to the needs.

Separate lakes have to be allocated for each different use as such drinking water, human external use-bathing & washing clothes, cattle bathing, agricultural purpose, fish culture, industrial purpose and domestic house uses.

Stored and stagnated water for longer periods and years will gradually improve the level of under ground water. So the temperature from the underground to upper soil layer would be less. Ensure the increase of food availability to both human and other living beings by the yields of crops, green vegetable, fruits from the trees, fresh water feed, cattle milk, poultry eggs and meat. As usual cattle excretion would be used for cultivation of crops and fresh water livings.

By having more vegetation like trees, plants and crops, air is purified, cooled, more oxygenated, reducing pollutants, thus avoiding the diseases from higher heat temperature.

The enormous number of wide walls across the rivers would serve as pedestrian way and small auto vehicles path across the river at good frequent distance. The cattle can go either side of rivers through the walls very easily after the flow of water above wall stopped. The cross walls can also be exclusively allocated for pedestrian cross, cattle, entertainment time passing etc.

Fruit bearing tree planting alongside the water stored rivers, pools and ponds and cultivation alongside the rivers to the possible wide area. Pisces may be grown in the divided lakes exclusively allocated for that purpose. The leaves, flowers, vegetables, fruits which fall on the stored water could be the feed of fishers there, after the necessary decomposition.

The sand and mud accumulated at the starting lake division of a river shall be cleaned year after year, after the maximum drying up. This sand and mud may be used for the construction of houses and building.

When this method is introduced the possibility of the present accumulation of more sand and mud at the joining places near sea could be eliminated to the higher extent.

The poor people shall not be left unnoticed as of now till the last. There must be something done at-least to have their future generations, their children, grand children and their heirs to have money, happy, healthily and respected life.

The present tiny, simple schemes by any organization would not give permanent solution to them. A mammoth project like the above shall be enacted to make it possible to have permanent remedy.

Although a lot of variety of schemes and projects are being made for these people by relevant international bodies, it is useful only to feed them a little for minimum period.

It shall not be allowed to keep the poor in permanent all the time, for the pity looking, mocking, cursing, ill-treating by the people of rich nations and to have the proud of being their's rich.

It may not be compulsory to follow the above project alone or as it is in the original version. But the ultimate aim must be a permanent solution to the hunger deaths.

New segments of pools may be created near the falls if any available in order to bring the water easily to the pools.

The tree rows alongside the rivers / lacks and pools and the cross walls could be utilised as entertaining places of the nearby residents.

Provides uniform living style without any disparity among the citizen there.

Involvement of every people of that area shall be arranged so that to get the maximum efforts to safeguard and maintenance of the installation in better ways.

Nearby residents of that area shall be utilised to establish the majority works.

Periodical rotatory group leadership would be arranged to supervise the system in multifold level.

A new order of civilization with betterment of humanity could be offered to the poorest who hitherto struggled in unnatural and inhuman conditions.

Hereafter more water shall not be allowed to run into sea or be wasted. It is very much needed to catch and store water for longer duration as much as possible so that to help and serve the human being ever and ever.

After the passage of huge water due to rain etc. which flow over the walls, abundant amount of water will stay in the henceforth lakes upto the level of walls on either sides.

RELIGION

Reasons :

Many religions-inner divisions within one religion – differences in some principles among them – have kept divided the mankind and made and making enemies each other. Truthful NGOS, local body administration, govts, international bodies and the UNO have to arrange such things. They shall be directed to not to talk about their religious matters in the togethrness meet but general topics such as global warning, famine, lack of fresh water, deadly deceases, menace of drugs abuses, heavy drunkenness, improper human behavior and character in general, extravaganza etc.

(Make) everyone to understand that the creation of any religion is only for the betterment of humanity, brotherhood and other good things.

The importance of togetherness of people belong to various religions must be given more publicity and weightage than to the togetherness of same religion people. The present day world is definitely found be divided religion wise. It is a dangerous practice as this will harm the stableness of the future world.

So it would be good to have friendship between nations of different religion than to the same religion to avoid the dividing of world by religion wise rule. The assembling of many nations of different religions to celebrate some function, exchanging of students, cultural shows, scholars, sports persons, doing business & helping each other in economic crisis.

The world shall concentrate on the humanitarian service without religion color.

Good effective religion needs no recommendations or propagananda or advertisement to have and attract more people. Now a days religion development work has become a good business and posh livelihood for many all over the world, specifically to a particular religion.

Truthful NGOS, local body administration, govts, international bodies and the UNO have to arrange such things. They shall be directed to not to talk about their religious matters in the togethrness meet but general topics such as global warning, famine, lack of fresh water, deadly deceases, menace of drugs abuses, heavy drunkenness, improper human behavior and character in general, extravaganza etc.

(Make) everyone to understand that the creation of any religion is only for the betterment of humanity, brotherhood and other good things.

The importance of togetherness of people belong to various religions must be given more publicity and weightage than to the togetherness of same religion people. The present day world is definitely found be divided religion wise. It is a dangerous practice as this will harm the stableness of the future world.

So it would be good to have friendship between nations of different religion than to the same religion to avoid the dividing of world by religion wise rule. The assembling of many nations of different religions to celebrate some function, exchanging of students, cultural shows, scholars, sports persons, doing business & helping each other in economic crisis.

The world shall concentrate on the humanitarian service without religion color.

Good effective religion needs no recommendations or propagananda or advertisement to have and attract more people. Now a days religion development work has become a good business and posh livelihood for many all over the world, specifically to a particular religion.

Let the people come only on their own, when they realize the necessity of particular religion. It must be understood that the world would never come wholly under one religion. The activities for such interest would only bring big chaos in the world. This wish of somebody or many will not be fulfilled ever and impossible. So the effort towards attractive and forced conversion from religion to religion is unwarranted and totally wrong.

Let the goodness of any religion may be broadcasted in the media but not compelling the other religion people to convert, join & follow.

As we have been living in different areas, studying in different institutions, different languages, buying and eating at various shops, hotel, various products, but not fighting for these variation and difference. So why should we need to fight since only because following different religions, which have almost the same principle of civilization and betterment of humanity.

People of all religion have the same body function, Life system, etc. Man's nature possession has not been varied by religion. So religion does not and can not give the life. Man alone has been giving life to the religion.

BAD PAST HISTORIES

During the development of human life system some early scholars and scientists emerged in some countries especially in the west and offered many new things and advancements to their nations and lands.

Utilizing these things those areas had become richer than others and started ruling the undeveloped poor ones.

At that time the powered men dealt the other land people as slaves and animals, smuggled their available wealth, extracted enormous labor, fed them little, denied education and knowledge, did cruelty and tortured, cut off fingers and limbs and killed / massacred them.

So the generations of the poor land gradually became weak both physically and mentally. It happened for many generation and centuries.

The wars, natural calamities, poor natural wealth, heavy climate, slavery – all made almost half of the world very poor and sick.

The rich nations were very proud and compared their posh living with that of the poor and enjoyed and enjoying the difference. And their poverty ridden life of poor and appearance shown in the media and cinema to have the mocking in the minds of the costly entertainment oriented rich people and their nations.

If the minds of these lavish people got little changed to show real pity towards the down trodden, these is a good chance of reliving the famine from the world at the very earliest once for all.

INSUFFICIENT NATURAL WEALTH AND UNSUITABLE ATMOSPHERIC CLIMATE

The vast variation in the availability of natural wealth like fresh water, coal, crude, metals, minerals, precious gems, the fertile soil etc. defines the living condition and standard of life of the people of that area.

In poor natural wealth areas the chances become reduced for more industries, agriculture and thus the employment and earnings. Extreme hot and cold for longer period of a year in some parts of the world are the reason for the tough living of mankind. Although some natural wealth is available in good quantity and people have the mind to work, they are unable to work hard due to this extreme atmosphere.

In some areas some metals and minerals may be available and other required things would be available only for beyond the distance of many hundred kilometres. In both the extreme hot and cold conditions there would not be enough vegetation. In these places maximum effort is spent only to maintain the life system.

But it is not possible for all the people to have life in the places of finest climate condition.

It is unknown that the exact reason to the secrets of creation of human beings at various places at various climate conditions i.e. approximately $1/3^{\text{rd}}$ world population at good / normal / average tolerable and $2/3^{\text{rd}}$ at extreme heavy hot and cold / without sufficient fresh water / minerals / and also barren lands. The difference for the rich / poor / middle, even right from the beginning of their embryonic formation is unable to understand.

So some possible people may better change their habitation to the possible places of better livelihood instead of wasting their generation of life without getting many thing.

NON – AVALABILITY OF GOOD SCHOLARS AND LEADERS.

This is an important factor to provide the happy and prosperous life to the citizen of a nation. Scholars and leaders of a nation are deciding the fate of the people of the nation. It would be no high when said so.

So probably good leaders with the advise and inventions of scholars are necessary to a country to be good. If the citizen & a country fortunately possess these things, they can have smile throughout of the time of life.

In reverse if bad leaders with the absence of great scholars and scientists and also unfortunately collude with evil association, the people of that country would certainly be dragged into poverty, and all sorts of troubled things occur most of the time in weeping life.

DIFFERENT TYPES OF GOVERNANCE AND DOCTRINES AMONG NATIONS

There are still monarchy, dictatorships, autocratic and barbarianism in addition to the civilized world's communism, socialism, Republic/democracy, There are also constitutional monarchies in the republic, democratic nations. Apart from the first four types the remains are helpful to the goodness of human life system.

There are important differences between communalism and Republic/democratic nations. In the first category the powerful leader who are elevated from the bottom or middle would rule the nation generally with the principles his own and probably from council of such advisory members.

Here people are not given the right to say anything about the govt. administration. The leader with a council alone is authorized to take decision for the people on their own. If the leader is good, the people could be having satisfactory life.

Here the importance is, no one can cheat other. Everyone has to work for their livelihood.

The prosperity of the nation depends upon the leaders ability and character. People cannot think of the change of govt. although it is not god.

In one direction they were just above only house cattle's but definitely better to democratic nations in some angle where they do more care on pet dogs than their fellow citizen. They had been provided everything such as food. Salter, etc., as to that of cattle. So the people donot worry about the basic things. There were not too many variations in the living standard among the people of the nation.

Now this system has slowly been changing into the method of little freedom life to the citizen of communist nations.

In republic / democratic nations directly or indirectly the people are the rulers of their country. In the process of periodical selection of people representatives, the verdict of the people is necessary. Majority verdict is considered for the selection of representatives for a term of normally four to six years.

People. Judiciary. Press. Media, can ask, oppose protect against the rulers in the course of their term if they have mistaken.

Judiciary and other independent bodies like election commission are vested with maximum freedom of power.

So the people at these nations are more happy than in other nations although they are poorer to some non-democratic nations in some cases.

The countries which practice less freedom to people are envying with the nations of more freedom people. They are afraid of their peoples change of mind towards more freedom if they have friendship with later.

The first one may think that the full freedom to their citizen may spoil the quick development of the nation and the people would go uncontrolled.

It might be believed that though the world may not have the chance of coming under one religion but to come under one sovereign system of governance that is democracy all over the world on one day may in a short near future, as this can only be the finest achievement of bringing all fellow human of world in the civilization of freedom world.

BORDER DISPUTES BETWEEN NATIONS

There are border disputes between nations by and for many reasons. It is not necessary here to go into research to identify the exact reasons for the border dispute between particular two or more countries. But we try to give some ways to solve them to have the henceforth dispute-less people / nation / world.

The such border disputes ought to be solved by the nations themselves if they do interest so within a considerable time and not to drag the problem for longer years. If not solved by themselves in a specific period the UNO must play a good role fixing a limit of within fives year from the date of the dispute registered in UNO by any one of the disputed countries. The UNO may do some effective actions to settle the problems once for all.

The people's verdict of the disputed land could be considered for better decision. If the area of land is big and can be an independent nation as so wished by majority native people, a secret compulsory polling may be conducted to know the peoples interest of independent state or not. If the people give 2/3 majority to a point, that would be taken for the final decision.

If 2/3 majority votes not in favor of separate state or the land is small, a compulsory open polling with the voter's individual identity may be conducted.

According to the percentage distribution in the voting the disputed land may be divided so that the right proportional portion attachable to the adjacent to the disputed nation can be decided. The people opted to the side (nation) with their identity may be smoothly shifted to the required side. The earlier wealth of the shifting people shall be compensated accordingly. All these things shall be conducted under the supervision of UNO.

All the international border on earth disputes to be solved at the earliest. They shall not to dragged for centuries and give hardship to the lives of the people in the disputed land and also to the other people of non-disputed and disputing nations.

Solve the problem once for all. World community donot worry about the emergence of a few new nation when in case of no other option. In fact people donot opt for small countries and divisions. They prefer to live in big countries rather than small ones. Even-then if they prefer to divide for a separate nation let them be separated.

To live happy, peace, cordial, wealthy, healthy a small piece of land may be thrown away. It would be a far better life to the citizen of a nation, provided they are not harmed for the sake of fighting all the time for a small land. The life system would be very good in problem less small countries than in a problem-full big country.

NO BROADMINDED WORLD CARING ATTITUDE

Higher selfishness is very much seemed right from the individual man to individual country – Real kindness, pity, love, affection, help, humanity etc towards others have been decreasing day by day. The previous days' people and leaders of just few decades earlier had lived, fought and sacrificed their wealth, youth, happiness and lives for attaining freedom and good life to the future generations.

The present day men have changed the life system into different mode. His and her caring starts with self, family and little with close relative and friends: that's all.

The next approach may goes in the following hierarchy. Affection towards people of inner division of religion, (like castes), same religion, local residential area, district, state, country and continent. From the individual man to country, has no broad-mind world-caring attitude. They donot care and even just not think of the sufferings, famine, dieing of people due to starvation in the other parts of the world.

So the people caught in conflicts and famine are not getting real human assistance from the able contemporaries. These cannot be a good world when there is no humanitarian approach by the rich towards the poor.

WRONG BELIEFS SYSTEMS AND PRACTICES

More old, primitive, unrealistic, idiotic beliefs, systems and practices are prevalent in poorer countries than in the developed and developing, specifically in poor east African countries and in some Asian countries.

It obstructs the thinking capability of the people for better future. They are submerged in such things for many centuries and some-times some people at some parts even behave like animals.

The festivals, rituals, work-ship of gods, family functions etc of many poor countries are inhuman, unnatural and barbaric too.

Let them need not invent new things but even not prepared to copy the useful modernity from the people of advanced countries which is now very much available at the finger tips via medias and communication advancement.

Since they donot concentrate on their own upliftment, it become unavoidable of the worst matters like AIDS, venereal diseases, illegal conception, abortions, large production of population, rape, child sex, human and animal sex, stagnation of drainage-garbage, escalation of many diseases, growing maximum mosquitoes, flies and other harmful insects. And also worst roads and poorer housing would always prevail with them.

WRONG CHARACTER AND BEHAVIOUR OF PEOPLE

Rough and rude, lazy or useless hard work, not maintaining good and cleanliness for self and surrounding, dirty, ugly foul smelling, non – morality of sex, mingling with diseased pet animals, cattle's and poultry are the bad thing found with remarkable percentage of world populations.

Sometimes heavy artificial fiber clothing in the hot sunny days and in contrast, sometimes very minimum dress to the level of just above the swimming two piece only during winter are worn by people. Then the showing of maximum of sexual parts which induces the others to feel to have immediate sex.

Many are quarrelling and fighting within them and have not followed the character and behavior of the people of the well cultured nation as role model.

They must be taught to follow only the good things from the rich advanced nations and not the useless things of such as the use of heavy drugs for more time for more drowsiness. All the bad and evil things have to be changed to have good life to chase away the famine and its deaths.

POOR FOOD HABITS, MIND AND BODY STRENGTH

The cooking and eating vessels are of very primitive type even today in many places and they are made of wood, leaves, wood barks etc. in addition to low cost metals. Many vessels are not easy to be cleaned fully. So stagnation of food particles at the joints and ditches of the vessels is very much possible. This invites diseases and makes the people weak.

Many have been in the habit of not properly cooking and boiling the flesh of animals etc. Cooking large amount at a time and bringing for many days without having the facility of freezer and fridge to avoid decaying and this damaging the food which would cause certain diseases.

Reasonable amount of population do-not have the knowledge to prevent the food from the damage of insects, flies, house animals etc.

Except in some regions the people at poor countries have not been having healthy mind and body. Since bad practices being catalyzed by many other evil things for many hereditary, the people donot have the bright brain possibility and strengthly body. The people of the poor countries are made to wonder the life of the people of rich countries and their entertainments. In addition to that they themselves have indulged in their own entertain-mental activities wasting the precious time so as-to work for their good future with good earning.

COMPETITION AND EAGERNESS FOR LEADERSHIP BY MANY

Competition is a strange subject. A question can be raised to know whether the competition is necessary in all walks of life, Except for few things, scientifically competitions need not be warranted.

Many can perform many good things without minding and thinking of competitions, first places, supremacy, strength, the result and proud.

If every individual society or nation work hard to some extant in useful directions with good ideas and knowledge there would be certain better results.

It is not necessary that everything to be competed with others. Let it be little or even bigger variation on the result / development; don't bother about it. If we do things to what can we do, that is enough. If few things are continued without any lapse then there would be no going back from permanent happiness.

In fact competition for more things and peak places yield tension, worry, anger, visible and invisible diseases in mind and body, spoiling peace and of course the real intellectuality, increases enmity, jealousy, wittiness, shortcuts, fights, lose of love – affinity – sympathy - fraternity etc. and totally humanity.

It is applicable from the classrooms, sports fields, businesses, election & selection of rulers, bureaucracy, work force and to religions.

In competition the brain work towards humanity and world sight is stopped but towards individual selfishness.

Even the competition in sports and games earn rivalry, enmity, permanent foes, corruption, bribery, quarrels, fighting etc. In addition to the earning of friendship, simultaneously make enemies, less happiness and problems.

All the defeats of sports and games are not taken lightly by all individuals and nations. They always keep the fight in mind and work continuously with a vengeance mentality to defeat the enemy who won earlier. So this type of vengeance mind is not good to the peace of mind and such repeated things would definitely escalate angry towards the nation and its people who won.

Then what is the real benefit on the line of humanitarian causes?

It might be more convenient at the next successive places than to be at first places. When attained first place at one time, the mind set will not allow to get down from that spot. If it happened with any little sliding, then it will be considered as a big loss and loss of everything to such persons.

Leadership eager

Eagerness for leadership by too many people is a big problem in many place especially at the bottom and medium levels; where at the top the competitors for such thing is reduced in number. Being human-beings a large people want to show their presence to the open world at least to their surrounding by any of the means either good or bad or mixed.

So they are being engaged in many things and doing many things to get the attention of others at large possible numbers. At first from the youth perked it starts with the activities of attracting mainly the opposite sex with the active involvement in sports, education, dress & cosmetics, affluent appearance, participation in entertainment and culture activities etc.

While a human is growing, he / she likes very much the fame, familiarity, praise, publicity, more people surround him in addition to the wealth, strength and power. Becoming the people leader is the most aspired thing of many. But it is not available to many and also not possible.

In a state or nation only a limited number of persons are requested to be leaders and representatives of the people.

Educational qualification could be made as one criteria to be a people leader. But the humanitarian mind and effort is more needed than the other qualification. There are also many less education qualified persons who have become people leaders all over the world than the highly educated non-leaders crowd. Some men at any cost want to become leaders. So they join politics and do all sorts of non-sense things to attain the important places in political sport.

Some are stating new parties with his / her leadership but rarely it signs. Some people are taking a different path to show their presence by the way of anti-govt, ant-governance doctrines, rebellion activities, militancy. Terrorism, illegal cruel activities etc.

To regulate all these things, there shall be some reforms might be enforced in making of people leader process. Minimum educational qualification, economic standard, other livelihood income sources, some entrance examination as in the process of other recruitments, training and passing of the test to make their mind into real social service activities may be brought into force. Why can-not some good training be given to the people leaders while correcting the save for an ordinary govt. job?

EXTRAVAGANZA BY PEOPLE AND NATIONS

Wasting of money and economy more-than the requirement, in the form of festivals, sports, rituals, religious functions, entertainment productions, unnecessary travels, wars, etc. is to be set right.

Time, money, energy, concentration, life span and everything are being wasted by the individual man to nations. There must be some limits to everything. If the limit exceeds even the finest thing would become poisonous. There must be scientific and systematic awareness to know the differences between rights and wrongs and also of the essentials and non-essentials.

If humanity and brotherhood-ness concern are improved among human, the extravaganza expenses might be reduced to considerable amount and the same could / would be diverted to the needs of downtrodden all over the world to have the happy contemporaries.

There are some scientific projects going on from this planet to know the things on other planets with unbelievable huge amount of expenses every year. Everyone to welcome the space missions which helped the life system on earth by the launching of satellites for national security, weather, education, telecommunication, media development etc..

But what would be the real benefits to common human beings on earth that are going to be received from the information on the other planet. It is also impossible for all the men except a rare few astronauts and cosmonauts and like can go to space and may or may-not near other planets that too after many years with the highest expenses. Some sort of proud only can be had from such projects to such nations.

Beyond the limit any amount is expensed for anything could only be an extravagance.

In many-advancements after reaching the maximum peak, further works are going on without any identical destination. Even after the so many science advancements and inventions no one is in a position to explain to how exactly the world and universal system appeared and when.

A good part from these enormous expense and attention for unsure result should very well be diverted to improve maximum of the downtrodden people all over the world, which would definitely benefit the human-beings on this earth.

Some countries with the high economy have already earned more by so many ways. These include invasion, exploitation of labor from poor countries, selling weapons and arms. For which they are doing undue things to create enmities between neighbours, cheating in trade policy, exporting goods in large number and importing little etc. for many decades.

The people of such these rich countries are being paid highest salaries incomparable to the very lowest salaries of developing and poor nations. The ratio in the difference of salaries starts from 1 : 100 to even unto 1 : 1000 times in regard to poor and rich countries respectively.

Therefore the rich people have been spending lavishly all the time and engaged in all sorts of bad things and spoiling the world culture gradually but certainly ruining which has been already hanging on the huge depth.

The higher salaries in rich nation may very well be reduced to correct the people who are almost always engaged in unwanted entertainments, luxury and compound and complex sexual lives. Since the availability of balance more surfing money on easy hands after fulfilling the essential basic needs especially with the young and youth people is spending unnecessarily

Living in permanent health and happy-ness shall only be the most needed and essential things of human life system. The mind and soul of every human would get the above two only by good deeds. Doing, seeing, reading, talking good things alone can give the best life. The sexual desire is a must and to be fulfilled but in a regulated system with the confirmative practices of society.

Most of the people of this world are knowingly and unknowingly spending their maximum free time in variety of entertainments and in the influence of drugs and drunkenness.

The entertainments are in the form of cinema, drama, serials, dance, music and songs, sports and games, fashion shows, gambling, lottery, casino etc. Certainly the recreation and refreshment is a must for a modern man to get relieved of his strain and tension.

Although it does not give any permanent visible benefits for prolonged period, it gives the firmly needed temporary pleasure to mankind.

But certainly there must be a limit in the expenses of time, money, energy and concentration in enjoying the entertainments.

What shall be the limit? It may not be or need not be the same to all human being. As per the availabilities of extra money, free time, situation, energy – the duration of spending in entertainments varies from man to man.

The poor and middle must not and could not compete with the entertainment duration of rich. It is made to feel whether they are brought to the world only to enjoy most of their times in entertainments alone. It is very crazy and also not clear how the difference could occur in the creation of human such as rich and poor right from the birth.

Sports and games and other variety of competition are being conducted throughout the world from the street corners of a slum to international level most of the time in a year and centuries.

It is very funny to say that some games are played for number of days between two teams and end without the result of success or defeat to any-side. The commentaries, live shows are broad-castled all the time and making the people to not to be allowed for other important and permanent benefit yielding things.

Cinema, music and sports are almost completely ruling the people of this world. The personalities of these fields are highly regarded and even they are treated as gods or equal to gods or at least messenger from gods.

Definitely the present day men are more interested than the past to complete their lives by maximum in pastime entertainment.

If the people of this generation has the belief that they are more brilliant than to their early ancestors, they must think and realize and put some self question to themselves. Are we doing completely right? The answer would be 'NO' if they are real brilliants.

Then they themselves would understand the limit of things, essentials and non-essentials, good and bad etc. Changes in the behaviour towards right direction will arrive.

What is Music?

Is it shouting in high pitch with inhuman voices and telling / singing bad things? probably too much about sexual appetite.

It seemed that the poets have left only one thing unsung till day that the male human will eat female human's excretory materials and he drinks her urine everyday, every time and enjoy the taste involving glittering curiosity. Even this too might have already been appeared in any one of the parts of the world. Who knows?

The male poets all round the world all the time writing mainly about women's beauty, sexual organ, copulation and such related things, alone. They are least concentrating on more important things which are ruining the world.

Many music around the world are becoming sound pollution with cruel sounds, sexy dressed, awkward dances, shaking and moving of body of next only to the doing of intercourse, ugly behavior - like animal activities and all nuisances supported by highest output of audio electronic system.

Music should have not been allowed to be done by machines and electronics. It has to come from the minds, fingers, heart, talent, practice, efficiency and involvement of humanity.

Now a days music and dances are made to only for the use of attracting the attention and affection of opposite sex persons.

It should be harmless, inducing love and affection, sympathy, faith, patriotism, devotion, dedication, bring self – gentle – rich flow in the mind and heart for a stable humanity for a long time.

Music must come from the heart and mind with deep sense of feeling and emotion. It must have the capacity of melting and making human and to feel a real long lasting happiness and memorable things. It shall not be very temporary with the creation of enormous mixing of sound by lot of electronic machines.

FASHION WORLD

If anything surpassing the correct level there could be the foulness. In many places fashion shows play the role and keeps the position next only to brothel, phonograph, sexual shows etc. Fashion shows have already come to the level of showing the sexual organs fully or partially upto 99 % with the use of one inch or lesser undergarment dress like things. In the near future showing of live intercourses may also appear in fashion shows. With their sexually giving poses, pushing their body, limbs and legs at varied difficult and troubling angles – inducing every human to have urgent immediate sex and also to cheat and have thirst eager a lot for opposite sex.

Namesake hiding, slightly or fully showing breasts, nipples, buttocks, genital sides and its thin clothed pressed projection and buttocks and chest shaking, unusual walking – What are the need of these things to sell a consumer product? Whether the majority people need these things? The people will always be buying things whenever necessary. Let them experience the good and bad and select on their own. Why these non-sense tricky inducements and spreading this menace all over the world irrespective of rich / developing / poor countries.

No doubt that this is definitely a cheating system being practiced for a long time without any limit, Mad crowds are engaging in this and supported by sexual music. The chests of fashion women are being decorated as such every man even the women to see and enjoy with eagerness. In fact the common people are made as prey and dragged into vulture cruel of false attraction.

We need a clear-cut answer to a question, whether these things are going to continue till the end of this earth or to have any right changes in the middle of the course unfortunately if not immediately. Allow more human to concentrate and do many good things for the further betterment of the world. Do-not waste the time and money of many.

IMPROPER DRESS CODE

There are vast differences in the normal dressing systems among the people of a same planet the earth. One religion practices most covering of women body whereas another religion have up-to 90 % open body dress. This variation has to be thoroughly studied. And there must be dress code especially for women uniformly all over the world. It need not be on either side and no compulsory to anyone particularly for the heavy covering.

The dress code shall be designed on the basis of essential, natural, genuine, morale, applicable and other related things to have henceforth-good society all over the globe. There is no frequent necessity lying for the designing of new dresses. Already there are thousands of moderate clothing styles available within us. So we can easily choose form many among the patterns.

This would be the one amongst the very basic things needed to attain the world decency.

Is this fashion world's majority dresses necessary and are followed prevalently? Whether the activities in the fashion world and the output are right? If they are right, why the public is not allowed in public to have the same upto 95 % nude life?

NON SUITABLE ADVERTISEMENT

People have to be made aware of the frauds and lies in more advertisement and glamour. The entire advt. industry has crossed the limits many a times.

Now the consumer have to spend more than 30 % to 50 % of the cost of a product for advt. while purchasing a commodity. There are so many harms due to the excess of advt.

Only the rich can become more rich and the others are going to bottom except a few lucky ones, in business world. The govt. must control the advt. medium with suitable regulatory amendments. There may be a scheme could be brought into effect to systemize the advt. of products.

The govts themselves could take the work of advts or hand over to the periodical licensees. The display of brand of items under exclusive groups with prices may be shown on all permitted media channels, newspapers and magazines.

Govt. can give the job of advertising the products to agencies on one or two yearly basis.

The advt. may have the following details of the products.

1. CATEGORY
2. NAME OF THE PRODUCTS
3. USES, BENEFITS, & SPECIALITY
4. AVAILABLE QUANTITIES
5. PRICE PER UNIT
6. LIFE OF THE PRODUCTS
7. ETC. (OTHER DETAILS IF ANY)

Charges for the display of advt. may be collected from the company preferably on half yearly account. The amount of charge may be calculated as per the size required by the manufacturer in the advt column / area.

Products display may be done in one row of same kinds in alphabetical orders. All kinds of products shall not be displayed in one channel to avoid the creating of difficulty to the common-man to grasp the details of the products in a particular kind.

So one day – one kind, another day – another kind may be displayed. The advt. may have pictures with the support of decent clothe worth models.

People have to experience the good, medium and low on their own and select the right and required products.

It is needed to be thought whether the present advt pattern is necessary which is run by the private sector without any norms. Can't it be controlled to a descent limit? This may vary to nation to nation according to their cultures.

As there are different life-styled people like Western, Asian, Indian, Chinese, and Muslim etc., the advt. pattern can be varied to suit their lives. All shall not be dealt in one pattern at least for certain period till the world one day uniformly regularized.

At present the western is spoiling and poisoning the world culture particularly the youth of other parts who become very easy prey at the quickest mode. Now the parts showing business of model girls to larger manufactures, may come to show their things on pressed, extended, enlarged condition even for ordinary consumer products, if it is not checked this escalating menace right now.

UNEMPLOYMENT AND IDLENESS OF YOUTH AND MANPOWER

This is an important very real problem throughout the world. It also leads to the development of terrorism, anti-social elements, criminals etc. in addition to prostitution, smuggling, corruption etc.

When the youth are kept unemployed and idle for long period, their physique and mind would not sit quiet. It brings rebellion and anti democratic norms into their mind stream.

Brothel, drug trafficking, smuggling, human suicide bombs, sexual assault, rape, murders, suicides, gonads and rowdies in politics and all illegal activities are due to the unemployment and idleness of man power for more time.

The younger flesh and blood could not be kept quiet without any work as to that of older men. So their natural youth body, mind and automatic stimulation shall be utilized right from the available time at any cost. Even some jobs with lower payments \ stipends made to be prevalently available to all the youths at the right period. This would streamline and regulate the youth force to same level for the present and future betterment of their nation and humanity.

Inventions of machines and computers play both the good and bad roles in the life of human-beings. Some machines are very essential as such works done by them could not be executed by manpower alone. For example – lath, welding machines etc.

Machines like JCB, Bull dozer, agricultural machines and computers are performing enormous works very fast. Certainly the manpower could not be compared to them. At the same time, bringing of more machines would definitely be doing undue things to the humanity and snatching of good amount of employment at all level.

The usage of these machines is very essential in the fast present-day life. But there must be a limit so that the human power shall not be kept idle. If not many bad things would arrive.

After providing enough employment to the requirement of the unemployment, the machines and electronics may be used for the balance work left.

Even-though the usage of the human force is much expensive in the place of the same amount of work done by machines with cheaper expense, it have ought to be done by human force itself at first if it is in definite need, for the goodness of humanity, because the poor and unemployed must be given jobs and food certainly.

We shall not think and act for the very present time alone. It would always be better to have thing for centuries. That alone could be the real brilliant activity.

Our ancestors have had provided many things for the benefit of their heirs on the line of nature as languages, literature, fundamentals of music, foods and the information of all ingredients, natural medicines and treatment, list of good and bad from the natural availabilities etc.

And also our forefathers have had done excellent services to the mankind with the use of only manpower. They had made enormous artificial rivers and their innumerable branches such as canals in various sizes and length, lakes, ponds, pools, wells, agricultural techniques and discovered use of metals, secrets of body, yoga etc.

Today the IT industry all over the world has been giving very high salary to the employees in its field. But a little amount of percentage of employment only could be provided all over the world in this field. If calculations are carefully done to notice the increase of the present unemployment percentage it would give an alarming harmful result.

By the every additional inclusion of one IT employee there may be the possibility of minimum of ten to one hundred human power become idle and unemployed. The electrical and mechanical machines are certainly necessary but at the same time the problem of unemployed population shall be kept in mind.

In fact this amount of machines might be used today, When the world has around one or two billions population only, instead the present period has more than 7 billion (700 cores) and growing more.

So it is liked to suggest to find ways and means to employ more persons and of course in the suitable fields as per their ability, what ever it may and give them all at-least moderate salary to run lives of their own individual and families.

The logic shall be that the available money must be spreaded to more people than to be given to less number of people. This would solve the unemployment problem to much / more extant. In fact the more money paid as salaries to some that too at the tentative age is being wasted mainly in extravaganza by youth. This has been spoiling the human society, culture, health future generation and changing the character and behavior on anti-human line. By having engaged in more entertainments they got more selfishness and donot care about the surroundings and human values.

They must be taught about the immense of life and to help the lower, perhaps they might have been given more money including for this purpose by the nature / god. Every activities of human-being might be weighed. Even if not atleast for the self-satisfaction and pleasure of service this shall be done.

Everyone's short life period has this little chance to serve the world. But only few percentages of dedicated people are serving the world really. Why can't be the others?

Serving the world would only give the unlimited ultimate satisfaction, peace of mind and happiness than enjoying the temporary entertainments more. So spend little in entertainments and more on service.

The persons are offered with more money could offer more for social service than the others.

In Hindu and many other religions mythology , it is highly reiterated to do good things in one's life to have good lives to self and heirs and even for the ones own rebirth in good manner.

NATURAL CALAMITIES

Variety of natural calamities have been harming and killing the human lives at large then and here. Tremor, earth quakes, land slides, volcano eruption, tornado / cyclone, storm hurricane heavy continuous rainfall, no rain fall, heavy atmospheric temperature, melting of ice bergs, sea eruption, big sea waves, tsunami, rise in the sea level are the important natural destruction on the human and other living things.

We have to change our life system to suit and adjust to negotiate such occurrences in future. There are so many ways and means have been designed for survival during before and after such calamities. We shall have the responsibility to follow the safety system as instructed by the authorities.

A question shall be raised to that, could the natural calamities be stopped, minimized, postponed, or diverted into unmanned / inhabitable areas like the center of the sea / atmosphere? It is seemed that mostly it is not in the hands of human. Although partially it may be impossible by the man, there are only some partial chances of minimize / postpone some of the evil effects. For that our life system has to be modified at maximum from the present methods.

Unnecessary necessities, manufacturing and usage of unwanted things ought to be stopped. Have simple natural food with little cooking, simple moderate housing system, reasonable clothing in addition to the physical and mental work of human-force for the real betterment of nature and human system.

Save rain and hill water, grow more vegetation and cattles, do natural agriculture.

Reduce factories, motors, auto vehicles etc. run by liquid gas fuel. The maximum amount of such items shall have to be energized by other energy fuels, which is certainly available on the upper surface of earth.

Nature has provided many good energy sources on the surface itself. It is not being used properly and not having concentrated. Crude and natural gas may be more valid and necessary to the nature of earth than the human-talk. The coal might have been given as one among them to the human as a source of energy by nature.

Heat of sun, waves of sea, flow of wind, gravitation of earth, freezing temperature of water, (ice bergs) wood, leaves, coal, living beings fodder, etc may very well could be used as sources of energy. Still the maximum knowledge has not come to use these energies.

Researches are being done on many things against nature and not on parallel and supportive to nature. Why have all the human-beings not realized this mistake?

Certainly there are vast energy sources which have been hidden in many natural sources like rays of sun and waves of sea. The very near period would witness no dark in night and only artificial days by the ensuing availability of cheaper electricity from sea waves.

It is nature's greatest concept. What we do is returned to us. So if we lead good natural life, nature will care for us. In reverse when we practice unnatural life we will be disturbed by nature. It is an automatic process and not being wontedly revenged.

The inner earth system ought to have the present composition of water, gas, crude may be in order to maintain its inner temperature, viscosity, bonding strength, gravitation effect, weight, mass, frictionless etc.. So is it highly wished that the sucking out of above things in lightning speed may indirectly or directly proportional to the damage of the atmosphere increasing the heat, spoiling the ozone layer, inviting more rays from the sun and thus more global warming. Thus harming living-beings and causing the creation of many deadly diseases, weak human-beings and their future generations, and thinning of flora and fauna.

No one can able to say whether our practice of utilizing the availabilities of inner earth like crude, gas, and deep earth water is right? Even in case if it is allowed by nature itself, what would / could be the limit for taking out of such resources.

The highest speed of emptying the inner setup might have dangerous repercussion to the forthcoming generations. There might be a possibility of complete empty-ness or collapse of earth in the near future.

Whether the availabilities of the inside earth are for the use of earth of it's own for its smooth normal prolonged functioning of it or for the use of human race or for the purpose of functions of both the earth and human and other living life systems?

It is seemed more that they are for earth's own self maintaining system than to be used by man that too in a rocket speed.

Really the nature has given to the human beings safe living with all the facilities on and above its surface and in some cases within a small short distance from the upper surface (Eg. – coal, metals, minerals etc.)

In such conditions when these energies are a must for human use, then these energies in the form of crude, gas etc right could been made available at a particular shorter distance which is easily reachable by men without too much hard efforts.

Therefore sometimes it is made to feel that whether are we doing / practicing in a wrong way.

Are all the things necessary for the human living-system that now possessed by human? When it is deeply thought that there are many things of the present are not generally required for human-beings.

The very needs of human system could be brought in an order of row. Basically food is the most important thing next to that of air and water upto the death of the living beings. The next is the sexual pleasure unto the able and desired time. These two things are naturally the most essential things of fauna. But unfortunately even in this developed and developing world, a large crowd of people is struggling to feed their stomach, all because of the non-awareness of the global values,

UNLIMITED DESIRE AND WAR

A few countries want to be the bosses of all nations. So they do undue things of dividing the neighbors as divide and rule, trick playing on each other, keeping alive the disputes between the neighbors, behaving friend and foe at a time simultaneously or one after another according to the situation suited to the guile nations.

And so they sell arms, other things and are cropping good money all the time. Entering at crisis in nations with weak political stand but good economic background and sometime the crisis itself designed by the funning nations, cheating and stealing the revenue sources continuously direct and indirect.

The good wealth accrued from such ways are offered to the citizen of the guile nation, to have them heavy luxury life.

The countries which are cheated behaving as if they donot know that they are being cheated. They don't have the knowledge of giving prior importance to have good relationship with neighbours than to have doubtful and volatile alliance with a boss partner at far away distance. Even-though the neighbour is a poor or developing, its friendship is the most needed one than to the far away rich bosses (of friendly appearance but selfish).

A few centuries ago a few nations with the support of guns and their big developments captured many parts of Africa and Asia. They dealt the people of the captured continents as slaves and animals. They did so many unspeakable cruelty to them, raped, tortured, damaged the physical and mental systems and parts.

They did not give sufficient food but extracted enormous work, used in war, fired, cut off heads or congenial parts, killed and massacred. And unfortunately in addition to the cruel doings all the cruelties were enjoyed by that rulers. The enjoying of such cruelties we the worst of all the real cruelties.

Many nations got freedom only after a very long struggle with the sacrifices of thousands and lacks of lives.

The reason for all the above incidents were the unlimited eager of having more land area under control and rule. This was a very bad behavior which is still continuing in the minds of the rulers of some countries even now. These characters are imbibed for generations by their ancestors and still living in the minds of the people and rulers of such nations. It is ridiculous of having such ideology even today and tomorrow.

Who knows? The same thing might be reversed after some time in due-course and go against the one time sinners of the past. While the joining togetherness of affected nations of the past takes place, this may occur anytime in the future which could lead to such reversible things to get punished the heirs of mistakers and criminals of the past. One proverb says the effects of deeds would be reversed after.

So the concerned nations are hereby instructed to be broadminded and donot practice the previous things all the time.

REDUCTION OF HUMANITARIAN ACTIVITIES

Sharing of availabilities, self-satisfaction with the self comparison to the people at lower, good habit and thought of sharing and giving the extra balance things to the lower after fulfilling their requirements are all become rare seen things today.

Corruption, bribery, bad politics, higher sale price, low cheating weight, adulteration of commodities, low quality products with the label of high quality and fake currency are become permanent. Rumour, condemning and fault finding of others and fixing others in trouble enjoying the difficulties of contemporaries, show business social works, illegal and cruel sex in different cover up, struggling, drug menace, children and women sale celebrating the bad persons etc. are the ways of life and been early accepted by the society.

While fellow countrymen with more qualifications and strength are struggling for life and livelihood money, some are demanding still higher money and fancy facilities without accepting difficulties of his own countrymen and lakes of contemporaries dying due to poverty and famine in many world countries.

The reaching of more money level by a few through business, jobs, etc and non – reaching of any money by many would bring chaos in the future world. The money-less people may indulge in more brothels. illegal activities and crimes, robbery, murder, suicide, kidnapping, assaulting, amputating, cheating etc.

Although the vast disparity between the rich and poor had not got grievous effects in the past and in the present, the future generation shall not to be thought as it would be so. They are very aware of the world, comparative and less humanitarian than the past. So the govt, public and private sectors may engage more employees at modest payments with reduced work than the minimum employees with high pay and larger more works.

BAD INVENTIONS AND WAR

Invention got two faces and phases. There are good and bad varieties – For good inventions, the inventor must have naturally possessed the following by own effort and interest such as love, affection, humanity, sympathy, fraternities, worldwide care, feeling to pains and difficulties of others.

When the inventors donot have such qualities, by whom the inventors would be of bad and destructive types. The bad inventors might be having the characters of selfishness, cruelty, hang around only small crowd, enjoying others difficulties, poverty, hungry, dying, death etc.

It is needless to teach the people to know, what are the good and bad inventions?

The invention of gun might first be viewed very good one when used on wild animals in forests. At the same time it became very bad while turned against man. Then the variety of the heirs of gun at billion times heavier and stronger have been arriving now and then all over the world, sincerely against the human-being. The magrititude has developed into an alarming rate that the globe could be divided into two halves or many pieces in few seconds (by atom weapons).

The answer would not be conclusive for a question if having been asked to that of what will the world do with the available atomic mega weapons all over the world which are capable of destroying more than ten globes / planets and also of continuous adding of atomic weapons every now then to the world? One short tempered leader of an atomic nation is enough to destroy the entire world in few minutes time.

Because among the most of manufactured things if any although of them is not used today, might be used in an another time & day when situation warranted. That is the case can also be referred to atomic bombs. A layman can understand the multitude of this evil effects.

The brothel bad businesses, liquors, drugs corruption, bribery, abortion of pregnancy, gambling, jackpot, and even too much of sports, crowd of music & dance, anti – human fashion shows are the bad inventions and secret evils of the human society. What are the real, visible and stable goodness and benefits to the society from the above features; Nothing!

Each one has its own diversity, strength, and effect in wrong secret direction. Some have big bad repercussion at once, Some are indirectly spoiling the precious time, hard earned money, energy, concentration which could have very well been spent for the definite, visible, identical betterment of humanity, provided the time is reduced in these evil things. Without the permanent good benefits the refreshment recreation and making mad of the mindless crowd are in full swing. Many matter have to reformed.

BAD ENVIRONMENT AND DANGEROUS DISEASES

Increasing of temperature, worst atmospheric conditions, bad behavior & character, food habits, way of life, bad beliefs, idleness, nature's undue activities, weak people, pollution, insufficient or less fresh water are some of the important reasons for the emergence of new deadly diseases one after another year after year.

All the above badness is can be changed provided when timely action is taken. Who have to take these action? – The people themselves, the leaders, the scholars, rulers, national and international bodies.

Prevention is better than cure..

The diseases caused by marquitoses, flies, and other small insects can be controlled to some good extend if the surrounding area is clean and with non-stagnation of water and living in net protected chambers.

Net protection is the best way of life to escape from the diseases of such insects. In some countries like India, these is a practice of making slow poisonous gas production around human by such some products. The continuation of this practice would be going to make the future human generations into very weak, pale, short life termed and weak end nervous and respiratory system, easy prone to many diseases. They would be weak in sexual appetite and totally reduced human-beings.

If the regular inhaling and respiring of such gases which is thought to be used to chase the mosquitoes and insects, really doing harm to human beings of present and future.

When it is continued for hundreds and thousands of years, the future average man would be certainly in reduced size and at one stage, the average man may be at 2 feet height and 20 kg weight.

Since the machines have replaced man's labor in all works, the future man would not be in a position to perform any physical work except his (Brain by few) eye, ear, mouth, tongue and hand fingers at slight work.

So these factors will make the future man with poor physique. Unless he / she voluntarily – does physical exercises regularly thus may not be avoided. So the food amount of future grown up man would be to that of the present day infant and may have the practice of using food tablets in future.

So this is the time to take all precautionary activities now onwards to avoid such happenings in order to stop these effects to the future generation of human beings.

Humanitarian cause has also to be developed from the childhood especially at school level to understand the future problem.

TOO MANY GODS

Some religion has single god policy but probably different principles of worshipping methods. Some religion have many god forms in statues for one god or many god and innumerable principles and worship methods.

It is not necessary at this juncture to research about which religion is practicing the right method. Here it is need not be our duty also.

But many things are not understandable. It is said by everywhere in every religion that god knows everything. And he is prevailing everywhere from the dust to down and all the world happenings are only under the influence, will and action of god alone.

If so why the enormous bad things (of course in the world's day to day affaire approximately more than 80 % are bad) are going on every where?

Why the god would have not created does not create all human in good ways. Why the majority people are diverted into bad things. Why do all the men should have not possessed with good behaviours. Why the man is allowed to select the right or wrong on his way alone. Might have the god not directed the man to go live good?

The god / gods himself / herself / themes / vas shall have the own duty to select the right things. What are the guidelines for right things selection? It seemed unfair that the human are divided to select good and bad by the almighty.

As per the natural concept disturbing, troubling, harming, cruel ling others are taken as wrong things. If so what about the almighty?

Why has not the god done the following – regulating the population, natural calamities, wars, famine, deadly diseases, murders, massacres suicides, accidents, drugs, liquors, prostitution, fashion shows, wasting of enormous precious time in too much of entertainments of some unnecessary, anti-humanity sports, jack pots, lottery, casinos, sex dancer etc. etc. Why has the god not given uniform limit and guidelines to lives of all human? Why he directs majority of the population in to wrong paths. The western country people have been mostly spoiling the world since long time and continuing till date and to tomorrow.

They invaded, massacred, cruelled, smuggled, cheated many countries and their people and spread their improper and bad culture all over the world with so many bad inventions.

If everything is by god why has he not made only good things, why he is making more bad things by the creation of more bad men? Whether the god is not totally good? And from the availabilities of things in the world it could happened to be taken into account that the god is $1 / 10^{\text{th}}$ good and $9 / 10^{\text{th}}$ bad as his / her creation is as such.

The religions and their leaders are giving and trying to give so many concepts and theories to justify the unbelievable things to possible extant. But many are not able to be understood and reliable to deep thinking.

Why the globe is not created with natural wealth and good climatic, conditions prevalently equivalent to everywhere and give equal life and happy to all the people of all religion. Why is it allowed some like Hitler, Idi Amein and many cruel kings and rulers of Europe especially the Germany, U.K. USA. to kill millions of human beings for their interest at their will. The one man Hitlor alone was responsible for the death of 25 million people during the world wars. And it is still being continued by such person and prominently by a few.

Why has the god been making human being to cruelty and killing children right from the abortion (foetus) and in tend, middle ages etc. Why the human beings are being killed in accidents, terrorist attacks, and robberies and also by rowdies.

Why not the difference between good and bad human, is in getting the sudden punishments. What have the infants and embryo children made mistakes. If they are to be killed in the very early course of life, they should have not been formed and removed even without identify and having the opportunity of seeing the world. For all these things no right, feasible, understanding answers are available.

If there is any god or not? If there god, how many gods? None or many. Is he good or bad or moderate?

ASCETISM

Some people are made to live with succumbed sexual appetite in the name of god / world service. Is it necessary to serve the world with this type of practice. Will it not be sin to have compulsory ascetic without fulfilling the natural concept of sexual copulation. Is it not against nature?

Do they join this thing with full maturity and mind development at the understanding ages? Most are made and by regular practice, automatically accustomed to such practice.

Whether any married are not doing good service to the humanity in the name of god, and are the married service workers not reaching the god in their humanitarian activities?

Sometimes some news are coming as there are various mistakes with the people in the practice of unmarried & ascetic maiden life.

Is it compulsory and necessary to not to marry if required to render service to the god and the people? Who propagated this negative ideology?

It may be correct if it is needed and wished by the individual on attaining maturity, and woman or man join such things. It could also happen due to non - interest in marriage, sex & body condition etc.

In a same religion, one is with family life and another without family life and both are accepted as good. Then what is the need to have compulsory unmarried for god service, and painfully many are brought into such training at their childhood ages and forced by the elders to fulfill their wish for many reasons of which one is poverty. Is it not an indiscrepancy in a religion?

It is highly intolerable that the god be a enjoyable silent spectator of people in the make of beginning of life by many with all cruel and burden.

If god is there in the world, he should have not ordered this creation to die at the behest and happiness of cruel man.

No salvation story by any could be accepted.

Whether is there somebody think that practicing ascetic for religion service because his or her god was an unmarried bachelor?

The children born by sexual copulation by the parents can't be forced or directed in to ascetic life in their inmatured child ages even by the makers themselves of the children. They made the children by having interestingly engaged in natural sexual pleasure, but denying the same to their children's future, The decision is taken mostly by the parents only, not by the persons who have to follow ascetic.

Because of poverty, more children in family, elder's more religions faith, parent's aim and interest of serving god by the donation and present in the form of sacrificing and expensing of the whole life of their own child occur. But even after donated their children to acetic system, the parents and other related elders continue to enjoy all the natural pleasures including increased sexual life.

Is it definitely possible for all the person, who are compelled to acetic life to lead and have 100 % free mind from the whole life of common man in all the entire lifetime. The word 'whole life' itself refers to the complete married life.

The people who follow asterism are being fed by very strong, nutritious heavy food than the people in whole life in many countries. Certainly more strong, nutritious food will increase more secretion of glands and other related natural activities. There are some bad news about them coming often in regard to the discipline break in non-sexual lives. May not have come all over the bad news outside, who knows all the happenings in this regard all the world. Certainly it could not be possible for all to have very genuine ascetic practitioner as it is confirmed anti-nature by any / all means.

In the world that while one very-very large section is very much interested in having married life, it is very strange on other side a least little group which said to be practicing ascetics which one is correct? Either both or only the acetic people or the people with mistakes in acetic life or the non-ascetic. Think and find the answer on your own.

If he is only one why did and does allow human to be divided with many religions and every religion into many inner branches. Is he enjoying many fighting and killing all the time in between them.

Why he is not punishing the bad than and there? Of course the bad and their generations are living better than good at many places. Comparatively to some what average good ones.

Even the countries and their people who did and are doing maximum cruelty to many other nations in the past and present have been living more prosperous and happy than the later. What is the justice morality and neutrality of god?

Why the people have to be killed at large by wars, diseases and natural calamities?

Are / were all the killed in the middle & life, bad and all the living up-to the last are good ?

Cent percentage wrong sequence is seen and more unacceptable things are there.

People of all religions are both good and bad, happy and sorrow, sick and healthy etc. There is no identical percentage differentialities among the religions in relation to good and bad effects of on human. And there are also people living in the same manner without god faith.

WRONG FUNCTIONING OF MEDIA

Media is the most powerful matter and having enormous effect and importance among the people. In a few second or minutes time this can do wonders with people.

But unfortunately many of the medias are harming the human society with their negative performances.

Half of the medias are always giving maximum importance to non-importance things, misguiding and teaching wrong to the people.

Propagating and teaching wrong thing is very easy and attractive than of the good things.

Keeping mind with large earnings all the time, the media spend much of the time in entertainment time passing, useless things and make the people to become useless.

For the sake of more money many are doing undue things – unfortunately media has also joined in the prey.

It is the spot where all the good and bad grow. Supporting and giving more importance to bad politicians, illegal and cheating persons, too much of cinemas, music, sports, fashion show and conducting man programmes related to them. This is escalating violence directly or indirectly, blocking good things, not supporting social works, not properly making the people aware about the good and bad, permanent and temporary, essential and non-essential.

These things would change the characters, and behaviours of people and rulers negatively. It is requested to them to direct the people more on humanitarian and intellectual cause than to whole 24 hours on entertainment enjoyment only. It is requested to avoid one sided and disparities in the news service in regard to various nations.

Even the BBC shows disparity in the news service. It seemed that it is not giving due importance to good, essential, caring, respectful news about India and some other nations but news for bringing bad image, non essential, mocking types. Whether the British and BBC have the same tendency of earlier mentality of succumbing poor nations even now if so they are intolerable to the decency of present day human life system.

INSUFFICIENT FUEL AVAILABILITY

Use of crude to be regulated so as to provide the living chances to the future human and also to the stabling of the earth planet system. If the present method continued for many long years possibly at more aggressive than now, there may be a possible collapse of the earth planet system and its own functioning in addition to the yield of very high atmospheric temperature.

So the today's human should not think of the present day alone and must realize to give care to future generation's of fauna and flora for millions of years and many billions of henceforth lives of the future world.

In fact the nature has provided some visible energy sources on the surface level it self. But till date, the human fails to make use of the energy source includes which the ever living sea waves.

Growing more trees getting more woods and this natural fuel could very well be used in houses and industries as in earlier days and could also be use with modern scientific touch to reduce the use of gac and oil fuel.

From individual man, family to nation and world the fuel economy to be maintained. Every individual man and family has to chart out their possible programmes well in advance. Unite many works that could be carried out in one time / successively in a traveling route one after another. It will reduce the trips of travel. While all the people keep this behavior, there will be sudden reduction in the traffic and the expense of fuel.

Then selecting the mode of journey to be decided according to the necessities. Using of Flight / Train / Bus / Tram / Own Car / Heavy Mobile / Moped / Bicycle / Walk ought to be selected as per the following things. Number of person travel, time, duration, distance, weightage time, importance of the travel, urgency, availability of other cheap modes. Traffic congestion, available size & facility of parking places in the visiting places, the accompanying passengers etc. shall be kept in mind and plan well about the journey in every practical life by every human-being.

Changes have to be incorporated in cooking methods and food habits and avoid unnecessary more boiling, frying, heating and cooling. Switching off unwanted electric lights, fans and other electrical accessories in every house, office, hotel and factory-would converge as a very large fuel saving method in every minute and hour in the entire world.

INTERNAL FIGHTING

Fighting is found everywhere as that of within a nation – between rebel groups rebel group / groups and nations and or military – clashes between different religions – different groups of a same religion – people of different language organization and ancestral, from other nations – in between political parties – lot of small and big industries etc.

All because of the power game, liking the superiority, individuality, leadership, fame, publicity, praise, interest on more sex with variety of sexual partners, wealth, etc.

There are some groups on the support of some principles and doctrines and fighting to establish their presence and rule according to their principles.

The rebel militant groups are of the emergence due to unemployment, poverty, weak mindedness, brain washing, like in heroism, proud of muscle power, neglected in the public society etc.

All the above could not be eradicated all of a sudden. There are so many things needed to gradually decrease these things. Good national and international people leaders, religious leaders and people's representatives are the essential factors. Sharing of wealth, caring of poor, less competition, natural living, less entertainment job for all, not keeping the youth idle, timely marriages, good-food, health, mind, more scientific approach, adoption of good guidance of scientists and scholars etc. have to be system of life.

SMUGGLING, SPYING, CROSS BORDER ILLEGAL ACTIVITIES

Value and price variations of same commodities among countries are the important reasons for smuggling. Human infiltration, border disputes, envy with neighbour's growth and religion of others, some countries higher eager for important position in world activities, strength, praise, respect, status etc. have been the main factors for the spying and cross border illegal activities.

Stealing details of other countries military, trade, scientific developments, knowledge and secrets with spy work – inducing riots and indirectly giving supports to rebels, terrorist / military in neighboring countries are bad works done for some countries.

Sending and selling of low priced self and other country products into the neighboring countries on illegal ways and not following international trade policies is one among the negative activities.

There are also smuggling of women and children for illegal sex, prostitution, criminal activities from and to neighboring countries and many illegal activities at the border areas of each neighbours.

So at first uniform price policy on commodities may be maintained in between the neighbouring countries having land connection and divided by only little distance of sea in order to avoid the smuggling of goods from one to another. Gradually uniform price policy arrangement shall be brought forward thought the world. Free trade zone in large numbers in many countries are needed to curtail smuggling. For all these things good friendship shall be maintained between neighboring countries.

Offending citizen who buy and keep smuggled goods shall also be punished in addition to smugglers. For the goods which having been manufactured in foreign countries, it might be made to maintain purchase bills for a considerable period of 5/10 years time. or got certified with the concerned office which may be opened exclusively for this purpose or some other office additionally assigned with this job.

Educate the citizen so that do not to buy unnecessary things and teach them to live upto their / countries standard only. Proper ideologies have to the taught to improve natural patriotism to care for the fellow poor countrymen and to spare the exces money to them.

Then things will appear to minimize the smuggling of goods and purchase of smuggled goods to greater extant.

A numbering system may be introduced for the token of having entered and permitted the purchase of foreign goods and that number may permanently be pasted on the foreign goods and made available till the life of the goods. All the electronic and electrical goods of foreign origin must made to posses such stickers.

NON-AVAILABILITY OF STRONG CENTRAL GOVERNING BODY OF THE WORLD

Weak UNO – need many reforms – improper representation strength of countries – Big and rich countries not obeying - lowly populated countries control the high populated countries – Invasion on other countries by a nation without UNO permission all have to be corrected. More money from rich nations has to be diverted to poor nations – UNO functioning must be very big with more employees from many nations – It shall be made as world parliament.

The only available world central governing body is UNO. But it is not in required strength. Strengthening and reforming of united nation organization is the most important thing of this hour to solve many world problems like famine, diseases, hunger death, invasion, war, genocide, disparity of people, improper trade, etc.

Although the UNO is performing with such pace and doing wonderful things all over the world, it is not enough to the present atmosphere. So thorough reformation shall be done to UNO to make as a true central governing body of the world. The things to be considered as such how far a central governing body is necessary for the nation good functioning, and so a strong central ruling body of the world is the most important in today's scenario.

The set up of permanent security council members of UNO with their veto powers was of the very urgent arrangements on the aftermath of world war II as it was direly needed on that time to avoid further wars and as the slavery world at that time needed it. But this system is totally inconducive to the present advanced and knowledgeable world.

The present security council permanent membership system with excusive to power and equal general voting eligibility of all nations from smallest populated country to largest populated country would not be a right proportion and the equation, The equal representation of nations with people and economical variance is definitely an unequal representation of the whole people's interest.

The UNO must be more powered than the present stage. Immediate action shall be taken by UNO and the world nations so that there must not be any hunger deaths in any country in future.

Each rich country may be allotted one or more poor countries under its control for care with a time frame of five to ten years.

In this type the rich nation is made to take full responsibility of the development of the allotted poor country.

Possibly nearer poor nations to the wealthy nation have to be allotted for better and easy service by the promoter. If it is happened, the country and the people who look after the poor country could become the exclusive reason for the happiness of the later. And their service would be remembered ever. The poor country and its people would be ever grateful to the helping nation and its people.

Even some big developing nations may also be allotted with some small poor countries adjacent to them under their care on the line of rich nations. As individual responsibility is fixed, there would be a healthy competition between the rich nations in the attention towards the development of poor countries.

UNO has to coordinate and monitor such arrangements.

The developed and the developing countries who are deputed with the responsibility of caring poor countries may also join richest businessmen / company to their support in the helping process. If any rich or poor nation behaves improper in this process, that country would be treated accordingly by UNO and world nations.

Since the individual responsibility is fixed with nations there may be a definite better chance of good developments in poor countries quicker than now. But, there must be arrangements to avoid the future becoming of nation on any kind to the promoting nation.

The UNO must be made full responsible for tacking of all international affairs. No country shall be empowered to invade any other country due to border dispute, disturbances due to illegal activities, bad ruling, necessity of change of rules, internal conflicts, racial problem etc.

An arrangement to be enforced that a country or team of nation or multinational force could act to take action against a country under the permission of UNO only. Any country negatively behaves and acts on as it own, which shall be isolated from all other nations for a considerable period and might be punished if needed so.

The UNO would continue the works of caring the poor countries as of the present system in addition to the fixing of responsibility with rich and developing nations.

The present strength and system of working of UNO is not seemed enough exact right one for the future effective actions and changes in the world. The UNO at present is being used by rich nations for their own will and interest. Sometimes it is considered for the namesake only.

The future situation must not be as such that no nation shall be empowered to enter into another nation on its own will and interest. Only after the problem is filed with UNO any action shall be made possible after good discussions and voting in favour of such action.

The separate groupings of nations must be avoided. Because these groupings may have serious repercussion in the future like the emergence of world wars between groups as in the past.

Therefore the UNO need to completely be reformed as of a world parliament. Its approval should be made a must for any action like war, economical sanction etc. on a country for any reason. So all the countries must be provided with reasonable representation on the basis of population and economic strength of nations.

Exiting voting system is disproportionate to the size of country, population, wealth, growth etc. Only five nations are vested with all the powers. Some small countries are having more powers than the big countries. It is a big anomaly and disparity of treatments among the representation in the UNO. The present existing proportion of representation had been done in very urgency on the aftermath of world war II. So it could not be taken as the complete correct system until the end of the world.

It would not certainly be proportionate that a small country with less population and weak economy and army is given the equal amount of representation on par with a large country with higher population, good or moderate economy and vast military. There shall be a proportionate representation among nations according to all the strength.

If the present system is continued ever and hereafter there may be a possibility of appearances of many more pieces of lands by breakaway groups due to ethnic crisis etc as separate nations.

On one imaginary calculation big countries like China, USA, Russia, Germany, India or South Africa could to be divided into hundreds and thousands of small countries of the size which are already existing in many numbers and given equal, voting right to that of more populated and economic strength nations.

The difference in the ratio between the countries with variations in all the strength may starts from 1 : 100 to 1 : 1000 too.

Is it quiet correct and acceptable to the logic reasoning?

Would a 5 lacks populated nation be equal to a 5000 lacks populated nation. Would a poor nation with lowest economy be equal to a rich nation with multi lacks times higher economic strength.

Therefore it must be the time to take some important decision without harming any individual people of the world. There must be a variation in the voting strength between countries like that of the variation in the number of people's representation within a country as per the population strength.

So the amount of population and per capital income / GDP / or any economical scale of the nations of the academic / financial year may be considered to derive a new voting pattern in UNO in place of the present unsuitable voting system.

Voting strength of a nation may be designed as follows. The multiplication of the economic strength and population of a country could be taken into account.

Since the population of many countries only in many millions, the amount of ten millions and the final fraction of 5 and above millions shall be taken for arising a basic measurement of 0-1 unit in regard to population of nations. To arrive the eligible number of votes of a country in UNO the following calculation may be enforced in UNO.

**No of population units x 1% of per capita income
of the nation (in dollars)**

100

(This may be modified as per the requirement)

As the strength of population and economic strength of a same nation may vary little from year to year the voting strength may slightly get fluctuated in some countries. Due to fluctuation change one in every five year all nations voting strength can be mode to be subjected to alteration. There may be a fixation of maximum number of votes by nations.

It would certainly be very reasonable and justified since the large and rich countries have more power than the smallest and poor nations.

Here some very important things must be minded. The voting strength is going to decide so many things and also the responsibilities of nations. As per the voting strength the nations have to pay the yearly share of money to UNO for its own functioning and international service of helping poor/developing countries and other world crisis.

So the logic behind the voting strength would be directly proportional to each other thing. All the countries even the poorest have to pay UNO share every year. But the poorest countries contribution would only be to the meager in the total as it might be at very minimum only, When of the poorest or any country unable to pay the barest minimum to UNO, that amount could be adjusted by some other means, some of which it is explained in this summary afterwards.

To provide the aid from UNO to a poor or a developing country, economic strength of that time and population shall be taken into account. The amount of aid might be finalized as per the multiplication total of the above sum. The UNO and rich nations may provide assurance as per the above calculation for their financial contribution to the countries in need.

The present system of security council membership and veto and other voting system is a unsuitable one and an unequal by all means – for example giving powers to only 5 or little more nations – keeping all other nations as their slaves and servants. One veto eligibility of a nation spoils the interest of the entire world. So if any one of the five countries with vote power dose not like an important thing, it will not be carried out. So there is a certain possibility of total flop to the humanitarian rights of the world. This is indeed an indirect form of autocratic and dictatorship!.

So a new voting system with right proportion to countries as per their economy and population to be formulated. In this system not any single country would be given absolute power to take decision on its own in world affairs and majority of the votes only will decide the situation of decision and finalization of execution.

There may be two types of majority for decision making may be fixed as to that of their importance and effect in global application.

1. Above 50 %/ 60% majority for normal ordinary international affairs.
2. 2 / 3 and above majority made to be needed to invade a nation due to ethnic, racial, border, extremism, utter worst internal problem etc.

To decide the borders, rivers / sea disputes 2/3 majority is good.

If 2/3 majority could not be get in continuous two sittings for such warranted purpose the third time's absolute majority is enough to finalize that decision in place of 2/3 on that particular matter alone.

Since more number of votes are vested with nations, the votes could be used in five different pattern by a nation.

1. Polling all votes in favour of a single decision.
2. Sharing the votes to favour for two decisions/ points by equal halves or as per the desired percentage by the nation (supporting two or more decision).
3. Favouring some percentage to a decision and keeping the balance as not voted. (i.e. Giving partial support to the action)
4. Favouring two or more decisions in desired, required percentages and keeping the balance also
5. keeping out of decision making and not involving in the voting also (Abstaining).

While polling the representative / ambassador of a nation to be associated with another one of his nationality to ensure the representatives corrected in exacting his nations entreat.

Secret voting as to that of public election is good so that to avoid enimity and groupings among nations.

So here the freedom of chance of sharing fullest interest of a nation is provided at the maximum level.

No one can play self game with its own stick, if these reform take place. And every nation would have the right proportional participation as to that of their wealth and population. This would be the best proportion of giving equality among people all the world and the nations on par with their living standard.

Otherwise in the present system, a small nation with less than a million population with lowest economy is permitted the same role of a nation of many million people and good economical strength. This is contrary to the fundamental principle of natural justice. There may be a possibility of opposing this reform by small countries when taken for consideration. But they must understand their strength and position and the future enormous benefits they are going to receive than the present when these reforms come into force. In addition to the definite possibility solving all major world conflicts.

It would not be moral and good to ask the rich and big nations to help for the poor, unless they are given their place, respect and importance.

The recruitment of employees and officers for the administration of UNO may also be done as per the nations voting strength proportion.

Unfortunately if the same present pattern is followed till the end, there may be a chance of creation of many break away small nations with very minimum population and weak economy and will get the right of a big nation like China, Brasil, Japan, UK or Germany. This would not be a brilliant practice.

In the present practice many of the variety of the world conflicts could not be solved by UNO. By the new system as the decision would be the final and the nation at mistake would be succumbed if not agreed upon.

So the UNO must be reformed very sincerely as to that of a world parliament for the civilized, genuine, morale, justified, proportional, rendering of strengthful service to the world to solve all the world problems in an automatic process by UNO which is the most essential of the hour. Fortunately if it happened the entire world problems would be solved very soon.

But there are chances of some big nations which do not really interested to solve the world problems may not agree to it. They want all world problems alive ever and quarrels between neighbours. And of course they are indirectly catalyzing these things to sell huge arms to them routinely and get good money for the affluent life of their own citizen at the expenses of millions of deaths in wars induced internal fighting in other nations. And in the melee they maintain this supremacy all the times.

As usual every country would have one nominated representative in UNO but with varied voting strength from nation to nation. The Secretary General, President of UNO and other office bearers can be had from the election with 2/3 or absolute majority from the representation who may even hail from any a small/ rich nation; or by some other suitable methods.

In this pattern all nations would abide by UNO decision which would be indirect verdict of the whole of the international community. The representative of a country would cast vote as per the instructions of the ruler of his / her country as usual. With an eye witness of his country official.

There after each and every international affair can be dealt and solved then and there by UNO. Due to this atmosphere peace and harmony would prevail, international integration would appear, chances of war between nations and world war would be stopped.

Famine and hunger deaths would come to an end, humanity would develop and cherish.

The competition in arms race and the fear of atomic wars may vanish though slowly. If good action started right now, the very near future would smile in happy better ever and ever.

To determine the items like free economical assistance to poor nations, interest free loan, low interest rated loan to the developing countries, the number of supporting votes would help in the decision making. The poor countries may be deducted their UNO finance share from the UNO assistance amount to them if they could not able to pay finance share.

If any nation not having continuously paid its nation share to UNO for three consecutive years, that country may be suspended from UNO membership and shall not be allowed to part in any world affair till it rejoin. Again to be join in UNO it has to pay its last all years unpaid amount to UNO fund.

Keeping in mind of this shameful act. All nation would pay their sharer UNO.

Fortunately when the UNO become as to that of a world parliament with varied voting strength, all the world problems including the major conflicts such as between Israel and palastine, India and Pakistan, India and China, border disputes and internal problem all over the world would definitely be solved very soon.

The could should behave as a one biggest nation. If it happened that would be the happiest moment of life of earth and its inhabitants all the time.

‘PRAY FOR REFORMS

Remember It is rare

Oh! My beloved friends everywhere
 Feel this beautiful world around your
 To all the affectionate people wherever
 We are the luckiest to be here
 Our given both once is very rare
 End of our life is very sure
 So better serve the world ever
 It's the finest chance of your
 Love and help each other
 Be loved and helpful by other
 Humanity is the need of this hour
 Care the lower all over
 To have you be cared by higher
 Finer youth is a shorter fire
 Effective merger is nature's desire
 Be happy ever do worry never
 To my friends wherever
 Care your health more over
 Ever spend your life braver
 Do greater things all over
 It would render peaceful wonder
 It is my saluted prayer
 Better waste not the future
 Remember!
 You won't get the chance of this rare
 Never after your ever.
